**Clarion FC-357**

€ 1.269,00

Clarion Studio Package, solid state, multi-pattern, large diaphragm, condenser vocal and instrument microphone with +10 gain switch and -10db pad. Studio package includes wooden microphone box, hard mount, shock mount, foam windscreens and flight case

**Atlantis FC-387**

€ 1.799,00

The Atlantis FC-387 is a multi-pattern and multi-voicing large diaphragm FET studio condenser microphone. This microphone is for recordists looking for an extremely diverse, unique and modern FET sound. It offers full and rich, low and mid-range frequencies as well as smooth and unique highmid and high frequencies no matter which voicing setting is selected.

**Oceanus LT-381**

€ 2.299,00

Oceanus Studio Package, large dual-diaphragm, transformerless vacuum tube vocal microphone. Variable omnidirectional, cardioid and figure-8 polar patterns. Studio package includes wooden microphones box, shock mount, premium 7 pin tube mic cable, power supply and deluxe flight case

**Eden LT-386**

€ 2.995,00

The Eden LT-386 by Lauten Audio is a Multi-voicing™ vacuum tube large diaphragm condenser microphone. The LT-386 is for discerning recordists in search of the most diverse and useful studio vacuum tube microphone. It offers a unique blend of classic and modern design theory which exhibits a smooth, rich low and mid-range as well as high mid and high timbre reminiscent of premier classic vacuum tube microphones. From its attached, semi-permanent, suspension mount, to its three different switches housed on the microphone itself, Eden offers an endless palette of sound.

**SERIES BLACK – LA120 (set van 2 stuks)**

€ 549,00

The **Series Black LA-120** small diaphragm FET condenser microphone pair by Lauten Audio is a professional and versatile pair of microphones for instrument recording. At its core the LA-120 features a U.S. made ultra-low-noise JFET amplifier, interchangeable 17mm pressure gradient condenser cardioid and omni-directional capsules, 50 and 150Hz low-cut filters, 10 and 15kHz high-cut filters, and a transformer balanced output. The low-cut filters help reduce boomy lows or low-end room rumble; the high-cut filters help tame bright rooms and sources. These features help you achieve excellent recordings regardless of your skill level.

**SERIES BLACK – LA220**

€ 479,00

The **Series Black LA-220** large diaphragm FET studio condenser microphone by Lauten Audio is a professional and versatile microphone for studio vocal and instrument recording. At its core the LA-220 features a U.S. made ultra-low-noise JFET amplifier, a 1" pressure gradient true-condenser capsule with cardioid polar pattern, independent 120 Hz low-cut and 12 kHz high-cut filters, and a transformer balanced output. The low-cut filter helps reduce boomy lows or low-end room rumble; the high-cut filter helps to tame bright rooms and sources. These features help you to achieve excellent recordings regardless of your skill level.

**SERIES BLACK – LA320**

€ 729,00

The **Series Black LA-320** large diaphragm vacuum tube condenser microphone is a professional and versatile microphone for studio and vocal recording. This microphone features a 1" gold sputtered diaphragm with cardioid polar pattern, dual-triode vacuum tube, 120 Hz low-cut filter, 12 kHz high-cut filter, and transformer balanced output. The low-cut filter helps reduce boomy lows or low-end rumble; the high-pass filter helps to tame bright sources. These features help you to achieve excellent recordings regardless of your skill level.
