Ethos Array

Ethos Array is centred on the **VA** enclosure, which has directivity of 120 H x 10 V. While the **VA** can be used free standing for vocal applications it is more commonly combined with the **Nd315** cabinet for extended bass response. The **Nd315** can be flown above an array or used as the basis of a ground stack. Multiple **Nd315** cabinets will lock together when ground stacked. For larger applications when substantial sub bass reinforcement is required the **Nd218** cabinet can be groundstacked with the system.

The heart of **Ethos Nd218** and **Nd315** is state of the art, long excursion neodymium drive units. The drivers combine light weight with incredibly linear cone excursion and benefit from high power handling with reduced power compression. **Ethos Nd** has been designed for life on the road with a heavy duty front mounted transit dolly, secured to the cabinet with heavy duty draw bolt catches. **Ethos VA Nd** is an upgrade on the original **VA** enclosure featuring a similar clip on dolly arrangement to the bass cabinets. The benefits are an enhanced flying system and the option of a flightcase protective lid. Existing **VA** cabinets can be upgraded to Nd specification.

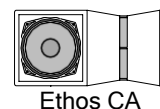

Ethos VA Nd	<ul style="list-style-type: none"> • Touring version of compact vertical array • Integral fly system. (Includes pins and splay bars.) • 2 off Neodymium 8" mid/bass cone drivers (500w RMS) • 2 off neodymium 1" compression drivers (160w RMS) 	2750.00	 <p>Ethos VA</p>

Ethos CA Compact Array

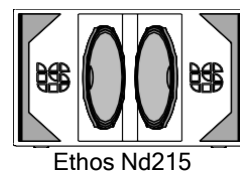

The **Ethos CA** is an ultra-compact fixed angle array box, which has been designed for ultimate flexibility. Having the ability to be pole mounted groundstacked or flown in an array, the **CA** enclosure gives you options that have never before been available from just one product. Functionality is further increased with the option of two coverage angles; 90 x 20 for the **Ethos CA20** and 90 x 10 for the **Ethos CA10**. While the **CA** can be used free standing for vocal applications it can also be combined with the **Ethos Nd115** or **Ethos Nd215** bass enclosure which can either be used as the basis of a groundstack or flown above an array. When further low end reinforcement is required the **Ethos Nd218** can also be added to the system. System control comes from the **DP2140** which contains presets for a variety of combinations.

Ethos CA20	<ul style="list-style-type: none"> • Ultra compact passive fixed angle array enclosure • 90h x 20v HF coverage • Integral fly system. (Includes pins and link bars.) • Variable angle Tophat mount • Neodymium 8" mid/bass cone driver • 2 off neodymium 1" compression drivers • 250w RMS power handling (16 ohm.) 	1780.00

The **LM series** have been principally designed as state of the art stage monitors. The passive only **LM12** and **LM15** enclosures are also fitted with a top hat to increase their functionality. The **LM15** and **LM20** benefit from cone drivers with neodymium magnet structures, while the **LM20** also benefits from being passive/ active switchable and a neodymium compression driver.

LM 12	<ul style="list-style-type: none"> • 12" Cone driver • Coaxially mounted 1" compression driver • 400w RMS power handling • 8 ohm • 55Hz to 20Khz frequency range • One off transit handle • Top hat mount 	1246.00	 <p>LM12 Cabinet</p>

ML Series is Logic Systems premium product range. With applications within Audio Visual, Church, Theatre and Live sound **ML** is a true multi-functional product. With symmetrical 45 degree back angles and rotating horn flare all cabinets can be used in arrays, in portrait or landscape mode for distributed systems, or for stage monitoring. All cabinets benefit from state of the art loudspeaker components, many of which benefit from neodymium magnet structures. **ML Series** products are designed for incredibly linear frequency response, which is enhanced when they are combined as an integrated system with the **DP2140** digital loudspeaker management system and the suggested bass enclosures.

ML8	<ul style="list-style-type: none"> • 8" Neodymium cone driver • 1" Compression driver on 90 x 60 CD flare • 250w RMS power handling • 16 ohm • 70Hz to 20Khz frequency range • One off transit handle and Top hat mount 	990.00	
			ML8

The **IS Series** of cabinets are a dedicated installation range aimed at the theme bar and nightclub market. Now in their second-generation the products are the result of extensive consultation with installation customers and aim to bring a quality of sound and build quality not normally available at this price point. **IS Series** are available in black, white and silver colour options.

IS7	<ul style="list-style-type: none"> • Compact full range background box • Bass/Mid: 6.5" cone • HF: Titanium dome • 100w RMS power handling • 8 ohm 	475.00	 <p>IS7</p>

Ethos Nd Installation bass enclosures

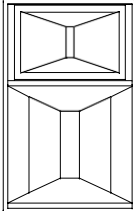

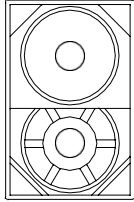

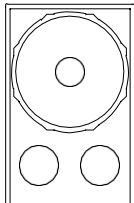

Based on the Ethos live sound range of bass enclosures Ethos Nd features state of the art, long excursion neodymium cone drivers, in a highly developed second generation twin tuned enclosure. Cabinets are intended for use in the landscape mode and are the natural choice for those occasions when only the ultimate bass performance will do.

Nd215i	<ul style="list-style-type: none"> • 2 x 15" bass cabinet • 2000w RMS power handling • 4 ohm • 40Hz to 150Hz frequency range 	2090.00	 Nd215i

Origin 1296 System

The Origin 1296 System is designed as a dedicated three box FOH concert system. The system features a horn loaded mid/top cabinet featuring exceptional spl and defined coverage. The bottom end is covered by a combination of bass and sub bass enclosures, which are run in parallel over the same pass band and share a common 40 Hz tuning. These are available in powered and unpowered options. The **DP2140** provides DSP control for the Origin unpowered system.

Origin

The Origin series is a range of Powered cabinets utilising the latest lightweight amplifier modules and onboard DSP software providing complete plug and go systems without the need for amp racks making set up time as quick as possible. Origin is also available in passive format using the Logic system DP2140 system controller containing presets for the Bi-amp operation of the systems. The range consists of three different systems and a powered monitor option. The Origin 12 system is a four box 2.1Kw system comprising of the Origin12 which combines a 12" neo mid/Bass cone with a coaxially mounted 1.4" neo compression driver and the OriginB115 which utilises a long excursion 15" Bass cone. The Origin 15 system is a four box 3.6Kw system comprising of the Origin15 which combines a 15" neo mid/bass cone with a coaxially mounted 1.4" compression driver and the OriginSB118 which utilises a 18" front radiating Bass driver. The Origin 12 & 15 cabinets can also be used on their own as a full range cabinet or as a compact and low line stage monitor.

Origin 12 Active

- 12" Neo Cone driver
- Coaxially mounted Neo 1.4" compression driver
- 350w RMS self powered with on board DSP
- External gain adjustment
- 60Hz to 18Khz frequency range

2400.00

Origin 12

Origin 12

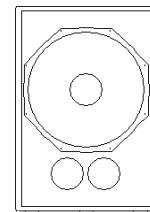

- Unpowered version
- 350w RMS power handling
- 8 ohm

1475.00

Origin 15 Active

- 15" Neo Cone driver
- Coaxially mounted 1.4" compression driver
- 600w RMS self powered with on board DSP
- External gain adjustment
- 55Hz to 18Khz frequency range

2560.00

Origin 15

Origin 15

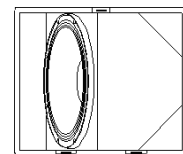

- Unpowered version
- 600w RMS power handling
- 8 ohm

1775.00

Origin B115 Active

- 1 x 15" bass cabinet
- 700w RMS self powered with on board DSP
- External gain adjustment
- 40Hz to 150Hz frequency range

2185.00

Origin B115

System control

The DP2140 & DP2160 digital system controllers provide the control for all Logic System loudspeaker products. Both units are housed in a standard 1U 19" rack format. The unit's key points are:

- 96 KHz operating speed
- 6 PEQ per input and output
- Hi shelf/Low shelf filters on input & output
- Adjustable delay on inputs & outputs
- Individual limiters per output
- HPF on inputs
- HPF and LPF on all outputs
- Large choice of filter types from 6dB to 48dB.
- Optional 'BV Net' network ready for computer control of multiple units.

DP2140	• 2 in 4 out DSP controller	1350.00
DP2140 BV Net	• 2 in 4 out DSP controller with network control	1450.00
DP2160	• 2 in 6 out DSP controller	1590.00
DP2160 BV Net	• 2 in 6 out DSP controller with network control	1690.00
BV Net Interface	• Network interface box with integrated USB adapter	370.00

Miscellaneous
