V13

€ **879,00**

The Vanguard V13 is a large-diaphragm multi-pattern valve condenser microphone. Crafted by experts over the course of 2 years, it combines vintage warmth with smooth modern detail. After extensive testing and listening by world-class engineers, we can say with pride that the performance of this mic will rival or exceed that of both iconic vintage and modern microphones at a fraction of the cost.

V44S

€ **749,00**

The Vanguard V44S is a stereo large-diaphragm multi-pattern FET condenser microphone. Lovingly crafted by experts over 2 years, it is designed to be a versatile, reliable, professional tool in the vein of highly-sought-after vintage stereo condensers of yesteryear. With a pair of coincident twin custom-voiced multi-pattern capsules, you can utilize X/Y, Mid-Side, Blumlein, and other less conventional stereo microphone techniques in a single microphone. With an all-new detented heavy-duty rotation mechanism, versatile splitter box, premium cryogenically-treated FET circuitry, and a VLSM shockmount, the V44S is the first and last stereo microphone you'll ever need to reach for.

V1s + Lolli

€ **1299,00**

The Vanguard V1S+LOLLI is a multi-capsule pencil condenser microphone system. A versatile, reliable, professional tool for any recording engineer, studio, producer, or artist. Five total custom-voiced capsules – in both small- and large-diaphragm formats, and with multiple pickup patterns – allow for a cornucopia of tonal variations for virtually any sound source or recording situation. With a “straight-wire” circuit design, premium cryogenically-treated FET componentry, an unparalleled selection of capsules, and a true heavy-duty shockmount, the V1S+LOLLI will be your new “go-to” microphone pair for stereo recording

- Small-diaphragm capsule – Hypercardioid (pair)
- Small-diaphragm capsule – Omnidirectional (pair)
- Small-diaphragm capsule – Wide Cardioid (pair)
- V34C Multi-Pattern Removable Large-Diaphragm Capsule Assembly (pair)
- VSSM Small Shockmount with aerospace-grade suspension rings (pair)
- Padded Pinewood Microphone Box
- Stereo Microphone Bar

V1 1x V1 + capsules & shockmount € **389,00**

V1 + Lolli 1x V1 + capsules, V34C lolly & shockmount € **679,00**

V1s 2x V1 + capsules, shockmounts & stereo microphone bar € **779,00**

V4

€ **499,00**

The Vanguard V4 is a large-diaphragm multi-pattern FET condenser microphone. Lovingly crafted by experts over 2 years, it is designed to be a versatile, reliable, professional recording tool that breaks the usual "bang-for-your-buck" curve. With our acclaimed edge-terminated ultra-thin custom-voiced capsule, a pad/roll off option, primo cryogenically-treated componentry, and the best shockmount in all the land, the V4 is made to be your go-to workhorse microphone at a price that won't break your piggy bank.
